AFRICOTTA · 2026 COLLECTION

WELCOME TO AFRICOTTA

Established in 1986, Africotta is a celebration of timeless craftsmanship and authentic African design. Every tile in our range is carefully handcrafted using cement, earth pigments, and a whole lot of passion. The result? Unique, durable, and beautiful tiles that transform ordinary spaces into warm, lived-in sanctuaries.

Inspired by the textures and tones of Africa's rich landscape, our tiles are ideal for those who love character, natural elegance, and artistic flair in their interiors and exteriors.

From rustic verandas to contemporary kitchens, Africotta tiles are designed to grow more beautiful with time - just like the homes they help create.

AFRICOTTA

AFRICAN INSPIRED HANDMADE TILES

COLOUR. SHAPE. CHARACTER.

Africotta is a collection designed to give you freedom.

Choose from a palette of 12 colours, a variety of handcrafted tile shapes and multiple formats to create surfaces that feel considered, individual and full of character.

COLOUR

Twelve earthy colours inspired by Africa's natural landscapes, textures and tones.

SHAPE

From classic squares and Subways to Klompies, Lanterns and geometric feature patterns.

COMBINATION

Use one colour, combine contrasting tones or bring different shapes together to create your own visual language.

COLOUR PALETTE

12 Colours. Inspired By Africa.

Our palette brings together 10 original signature colours, inspired by the natural tones, landscapes, earth, and stone of Africa, alongside 2 new copper tones: Copper Terracotta and Copper Terracotta Light.

From soft, understated neutrals to warm, earthy shades and deeper tones, the palette has been created to work beautifully across a wide range of interiors and exteriors.

Handcrafted Colour

Africotta colours are handcrafted, meaning subtle differences in tone and surface are naturally present from tile to tile.

These variations are part of the product's character and help create a finished installation that feels authentic and individual.

OIL FINISHING OPTIONS

One Colour. Different Expressions.

Africotta tiles can be enhanced with a natural oiling process using a **50/50 mixture of boiled linseed oil and turpentine.**

Additional layers of oil can create different levels of colour depth, allowing the same base colour to take on a range of visual expressions.

Soft / Natural Tones

A lighter expression that retains the softer character of the original colour.

Mid / Earthy Depth

A richer appearance with increased warmth and definition.

Deep / Richer Variations

A deeper, more intense interpretation of the same colour.
